

PROJECT REPORT

Kwazulu-Natal Flood Relief

PROJECT OVERVIEW

KwaZulu-Natal floods came without warning and have proven to be particularly destructive due to the region's steep terrain and narrow valleys, which has caused water to flow quickly and hence caused the devastating flash flooding of 2022. The KZN Flooding caused damage to the infrastructure, such as roads and bridges, and lead to landslides and erosion. It has caused serious consequences for people and communities, including loss of life, injury, and displacement.

In response to the crisis, Ashrafal Aid International humanitarian organization, partnered with the Industrial Development Corporation (IDC) to provide aid to those affected by the floods. With the support of donors and other close partners, we were able to distribute food hampers to victims in rural areas of KZN. These hampers contained essential food items, such as rice, beans, and cooking oil, to help affected families meet their basic needs.

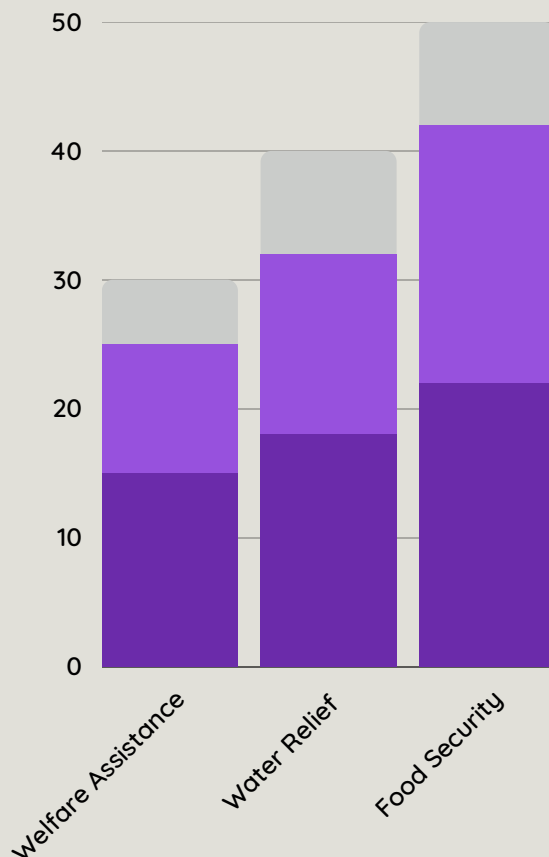

In addition to providing food aid, Ashrafal Aid also worked to address the water shortage caused by the destruction of infrastructure. To alleviate the water crisis, we bored boreholes in affected areas to provide clean drinking water to those in need and supplied communities daily with 5-litre water bottles. we further

Through our efforts, Ashrafal Aid was able to support a total of 20,000 beneficiaries in the KZN region. The organization's response to the floods was widely praised for its effectiveness and efficiency in providing aid to those affected by the crisis. Overall, the floods in KZN in 2022 were a major disaster, many people were able to receive the aid they needed to recover from the crisis through our efficient disaster relief services.

PROGRESS OF OUR PROJECTS

Ashrafal Aid provided emergency relief to communities affected by the flooding, including access to clean water. They distributed bottled water or set up water purification systems to provide safe drinking water to affected communities, and also drilled boreholes in various communities to increase access to clean water. Ashrafal Aid also provided food assistance, including the distribution of non-perishable items like rice, beans, and canned goods, as well as hot meals through community feeding centers. This assistance was critical during times of flooding, when affected communities may have struggled to access basic resources.

6 BOREHOLES DRILLED

Ashrafal Aid drilled boreholes across the KZN region to ensure a consistent and reliable source of clean water, during times of drought or other water shortages. we are currently 82% completed with this project

50 000

Individuals were assisted with water

10 000

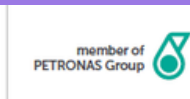

Individuals were assisted with food hampers

THANK YOU TO OUR DONORS

Overall, food security is a critical issue during times of flooding, and it is important for affected communities, as well as local and national authorities, to work together to ensure that people have access to sufficient and nutritious food. This may involve the efforts of many different organizations creating Ubuntu in a time of need.

Access to clean, safe water is essential for the health and well-being of affected communities, as it helps to prevent waterborne diseases and other health problems. These types of assistance can be critical for people living in difficult circumstances, such as those affected by this unforeseen natural disaster. Ashraful Aid works closely with local communities and governments to ensure that assistance is tailored to the specific needs of the people we are helping.

Rebuilding a community after a flood can be a complex and challenging process, with your help and the generosity of other donors from around the world, there is hope that communities will recover and rebuild their lives.
